

Challenge 3.2 - Stop Watch: Start Your App Idea in Xcode

Sketch to UI

Review your sketches and notes for your app idea. What screen or feature is the most important?

Use Xcode to block out the user interface (UI) with buttons, text fields, labels, and images. Run the app on the iPhone Simulator and see how it looks.

Need an app idea?

Make a Stop Watch app. Sketch out how you would display the current time, buttons, and layout.

Bonus 1: Save a screenshot of the iPhone Simulator using the hotkeys Command + Shift + 4 + Spacebar

Bonus 2: Share your first app screen on Facebook or Twitter #myiPhoneApp
